

ERMA 2019 Annual Conference and General Assembly Brussels-October 11/2019 - Registration form (page 2)

Trading chemicals around the world stimulates competition, provides an incentive to develop new markets through innovation and stimulates production efficiency.

As a historically important player in the global chemicals market, the EU chemical industry continues to benefit from trade opportunities and above all, it helps to improve the quality of human life.

It is highly important for the European chemical industries to discharge their environmental and social responsibilities integration in business models for a sustainable activity. The majority of the European chemical industries have already demonstrated a strong commitment to environmental and health via different programs.

Today's there are more and more challenges for the European chemical industries and the ERMA 2019 Annual Conference once again will provide a unique platform for resin producers, R&D team, distributors and partners to meet and share knowledge and information for a better strategy and road-map.

Our 2019 conference topics should help members, partners and chemicals community to have a better view on challenging subjects (Regulatory, Environmental, Health, Market evolution, Competition, R&D and Sustainability).
