

Event: ERMA 2nd Quarter 2021 Webinar

June 17th 2021 – 10.30 > 12.30

The Brexit remains one of the leading challenges for professionals in the chemicals industries and market, whether they are based in the UK, selling products into the UK, or exporting from the UK to the European market. Any company importing, manufacturing, formulating and/or using chemicals now needs to comply with a set of new requirements in UK and EU. It's important to stay informed as the Regulation is developed and amended, and to know how to comply with the requirements that affect business and market.

The upcoming ERMA “2nd quarter webinar” event help to keep informed. During this event speakers will provide the key information on post-Brexit challenges and solutions for business and regulations management (UK & EU).
